

DeoJay Red Rubber Grease

Description

Red Rubber Grease is medium consistency grease, based on a vegetable oil and synthetic agent fortified with additives to improve it's resistance to oxidation and corrosion

Applications

Red Rubber Grease is formulated for rubber to rubber lubrication where ant effects such as hardening or swelling of the rubber must be avoided. It can therefore be used on automotive hydraulic brake and clutch components, where compatibility with natural rubber and SBR seals is involved.

Features and Advantages

- Compatible with natural and synthetic rubber.
 - Good anti-corrosion properties..
-

Physical Characteristics

Appearance	Red, smooth, buttery
NLGI Classification	2
Rubber swell, % volume	70 hour/70degC +1.9
Neoprene, % volume	70 hour/70degC +5.2
Butyl Rubber, % volume	70 hour/70degC +1.0
Oil visc @ 40 deg C cST	n/a
Temperature range deg C	-40 to 140
Base	Vegetable

Sizes 500 grams tub 15kg pail 50kg pail 180kg drum
